ABOUT

Results-driven Flutter Developer skilled in designing, developing, and deploying cross-platform mobile applications for iOS and Android. Proficient in Flutter, Dart, Clean Architecture, and state management (BLoC, Provider). Experienced in RESTful API integration, responsive UI/UX, and app optimization. Successfully published and maintained apps on Google Play and the App Store. Passionate about delivering high-quality, scalable solutions and continuously improving development processes while staying current with the latest Flutter technologies.

EDUCATION

Bachelor's degree in computer science (2020-2024)
Faculty of Computer and Artificial Intelligence, Beni Sueif University

SKILLS

Programming Languages & Framework

- Dart, Flutter, Java, C++

Backend & APIs

- RESTful APIs.
- Firebase (Auth, Firestore, Storage, Cloud Messaging)

Architectural Patterns

Clean Code, Clean Architecture, MVVM, Bloc Pattern, Cubit, Provider, Getx

Tools & Technologies

- Git, Jira, Postman, Swagger, Figma
- CI/CD Pipelines (GitHub Actions, Codemagic)

WORK EXPERIENCE

Flutter Developer at KamahTech

present
On site

- Developed and maintained robust cross-platform mobile applications using Flutter and Dart.
- Integrated mobile applications with Odoo ERP, enabling seamless data exchange between backend systems and front-end user interfaces.
- Collaborated closely with UI/UX designers to implement modern, responsive, and user-friendly interfaces tailored to business requirements.
- Utilized Bloc and Cubit for efficient state management and to maintain a scalable and testable codebase.
- Participated in code reviews, enforced coding standards, and adhered to clean architecture and SOLID principles to ensure maintainability and performance.
- Worked in an agile environment, contributing to sprint planning, debugging, and delivering features on time.

Flutter Developer at Five Software Solutions (Internship)

10/2024 – 01/2025
Remote

- Designed and developed high-performance Flutter applications with seamless UI/UX.
- Integrated secure payment gateways and data encryption techniques.
- Utilized CI/CD pipelines for automated testing and deployment.

PROJECTS

HR Management (KamahTech)

Google play & App Store Uploaded

Mobile application developed using Flutter for comprehensive HR management. The application features modules for leave requests, loan management, mission tracking, and payslip access. It utilizes a layered architecture with API integration for data retrieval and persistence. Key features include user authentication, role-based access control, and real-time updates.

Van Sale (KamahTech)

Google play & App Store Uploaded

Developed a comprehensive Flutter application for managing stock, tracking journeys, and processing customer returns. The application includes features such as stock level monitoring, internal transfer requests, driver management, real-time driver location tracking, customer visit creation, and customer return processing. The application utilizes a modular architecture, incorporating REST API communication, local storage, and state management with Cubits. Key technologies used include Flutter, Dart, Dio, Shared Preferences, and Google Maps.

NeuraDerm (Graduation Project)

Created a Flutter-based AI-powered medical application.

Designed a secure patient profile and medical history system.

Applied data encryption and security protocols.

Gemini Clone (AI Chat App)

Developed an AI-powered chat application clone using Flutter and Google Generative AI API.

Implemented interactive content generation and markdown rendering functionality.

Demonstrated expertise in AI integration and state management.

Joumla

Created an e-commerce Flutter application using Bloc (Cubit) for state management.

Implemented RESTful API integration for product catalog and user actions. Developed shopping cart functionality and favorites list with HTTP package integration.

My Portfolio

Designed and developed a responsive personal portfolio website using Flutter Web, showcasing technical projects and professional experience.

Leveraged GitHub Pages for seamless deployment and hosting, ensuring reliable accessibility and easy maintenance. Implemented cross-platform responsive design with custom animations, ensuring optimal viewing experience across desktop, tablet, and mobile devices.

Tejara (E-Commerce App)

Built a modern e-commerce Flutter application with Provider pattern for efficient state management of cart and favorites list.

Implemented a polished UI with custom animations and smooth transitions for an engaging shopping experience. Utilized multi-provider architecture for isolated state handling, alongside cached image loading and shimmer effects for seamless product browsing.
